Dear iPHA members,

We hope you've all had a great start to 2017. As you can imagine, preparations for the conference in Vienna are now in full swing and we're really looking forward to seeing many of you there. As well as taking a closer look at the conference, this issue covers all the latest news from our affiliates, international projects and more.

Enjoy the read!

**Passive House Institute contributes to
Green Tower preliminary study**

A rendering of the Green Towers project in Frankfurt © Green Towers

Corinna Geiger from the Passive House Institute recently completed a preliminary study for [Green-Towers](#) in Frankfurt, a Passive House high-rise concept building. The feasibility study, conducted in close collaboration with the client, found that it was relatively easy for the concept to reach the [Passive House Plus](#) Standard. Mr Weber, the developer behind the concept, hopes to have similar Green-Towers projects in London, Barcelona and other major international cities
